

Aryeh Sand

Aryeh Sand is an analyst with Telecom Advisory Services, specializing in financial research and modeling.

His projects with Telecom Advisory Services have included:

- Developing a market sizing model for multinational credit bureau
- Developing a regression model to analyze the correlation of LBO success to variables such as credit spreads and market conditions.
- Financial analyses of private equity investments in telcos including BCE, Alltel, One GmbH, and Madison River.
- Compilation of industry economic and financial data for ongoing usage

Prior to joining Telecom Advisory Services, Aryeh was a research coordinator at the Columbia Institute for Tele-Information, where he was responsible for coordinating and assisting with financial and economics research relating to the media and communications sectors. Prior to being promoted to research coordinator, he was a research analyst covering financing and accounting issues.

Aryeh is completing an Honors Bachelors of Commerce at the University of Toronto, where he is specializing in Finance and Economics.
