

JAVIER G. AVILA

Javier Avila is a research analyst with Telecom Advisory Services LLC, specialized in economics and regulatory frameworks, based in New York.

His projects with Telecom Advisory Services LLC include:

- Researching the status of FTTH deployments in various OECD countries and provide analysis of possible scenarios
- Responsible for researching broadband experiences and regulatory frameworks for broadband deployment of various OECD countries
- Compile financial information of main telecommunication players in various countries in support of the study on “The impact of explicit and implicit FDI restrictions on telecommunications” and on “Latin America Telecommunications Market - Future scenarios”

Prior to joining Telecom Advisory Services LLC, Javier worked as a Regulation Analyst for VTR Globalcom S.A, in Santiago, Chile (Largest multi-channel television and residential broadband internet provider and second largest provider of residential telephony services in Chile). During his time with VTR, he compiled and analyzed obligations imposed to operators with significant market power in the retail telephony market, reviewed whether the services provided by the company or competitors complied with the law and regulations in force, estimated the impact on VTR Globalcom S.A. of new products released by competitors, reviewed the model for the calculation of the interconnection tariffs and internet resale tariffs, and prepared annual management reports for the Regulation and Wholesale department.

Javier Avila holds a MA in Applied Economics of The University of Chile and a BS in Economics specialized in Public Sector Economics of The Litoral Polytechnic School of Guayaquil, Ecuador. He is fluent in Spanish and English.
